# Work and life
# One clear view

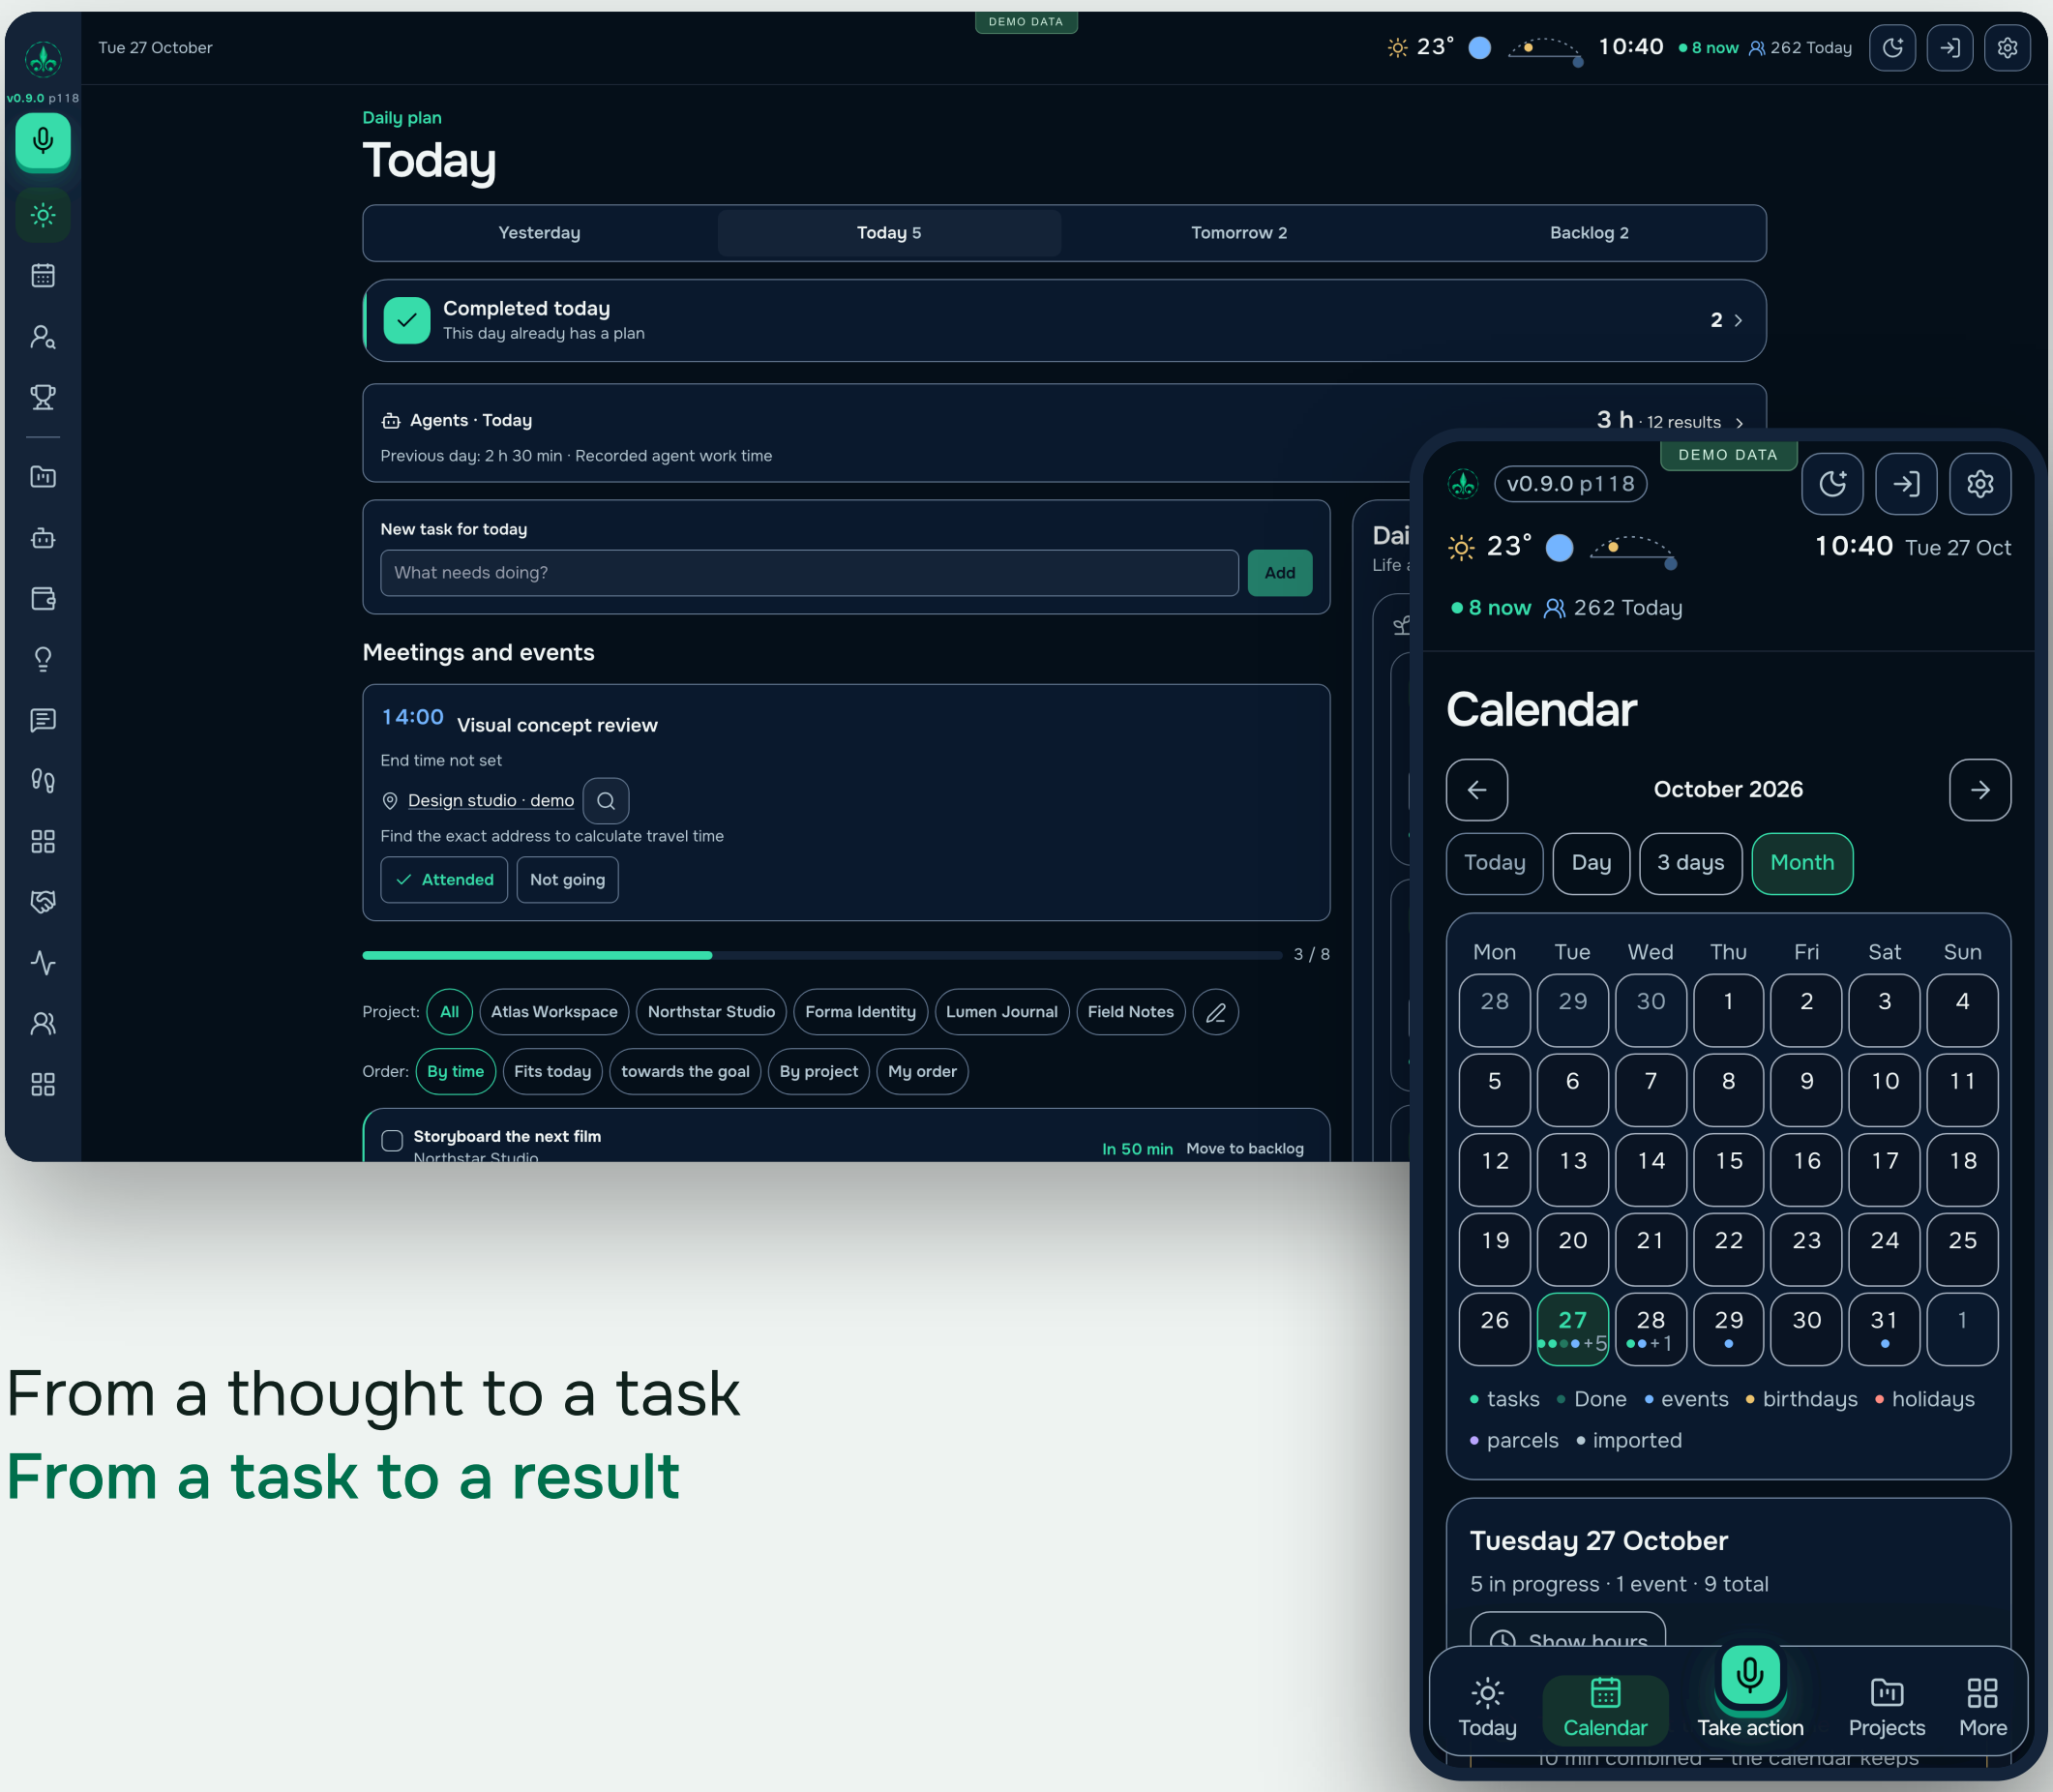

A personal operating system for building products, running projects and making room for life.

## The context you need
## The next step that matters

# A plan you can actually act on

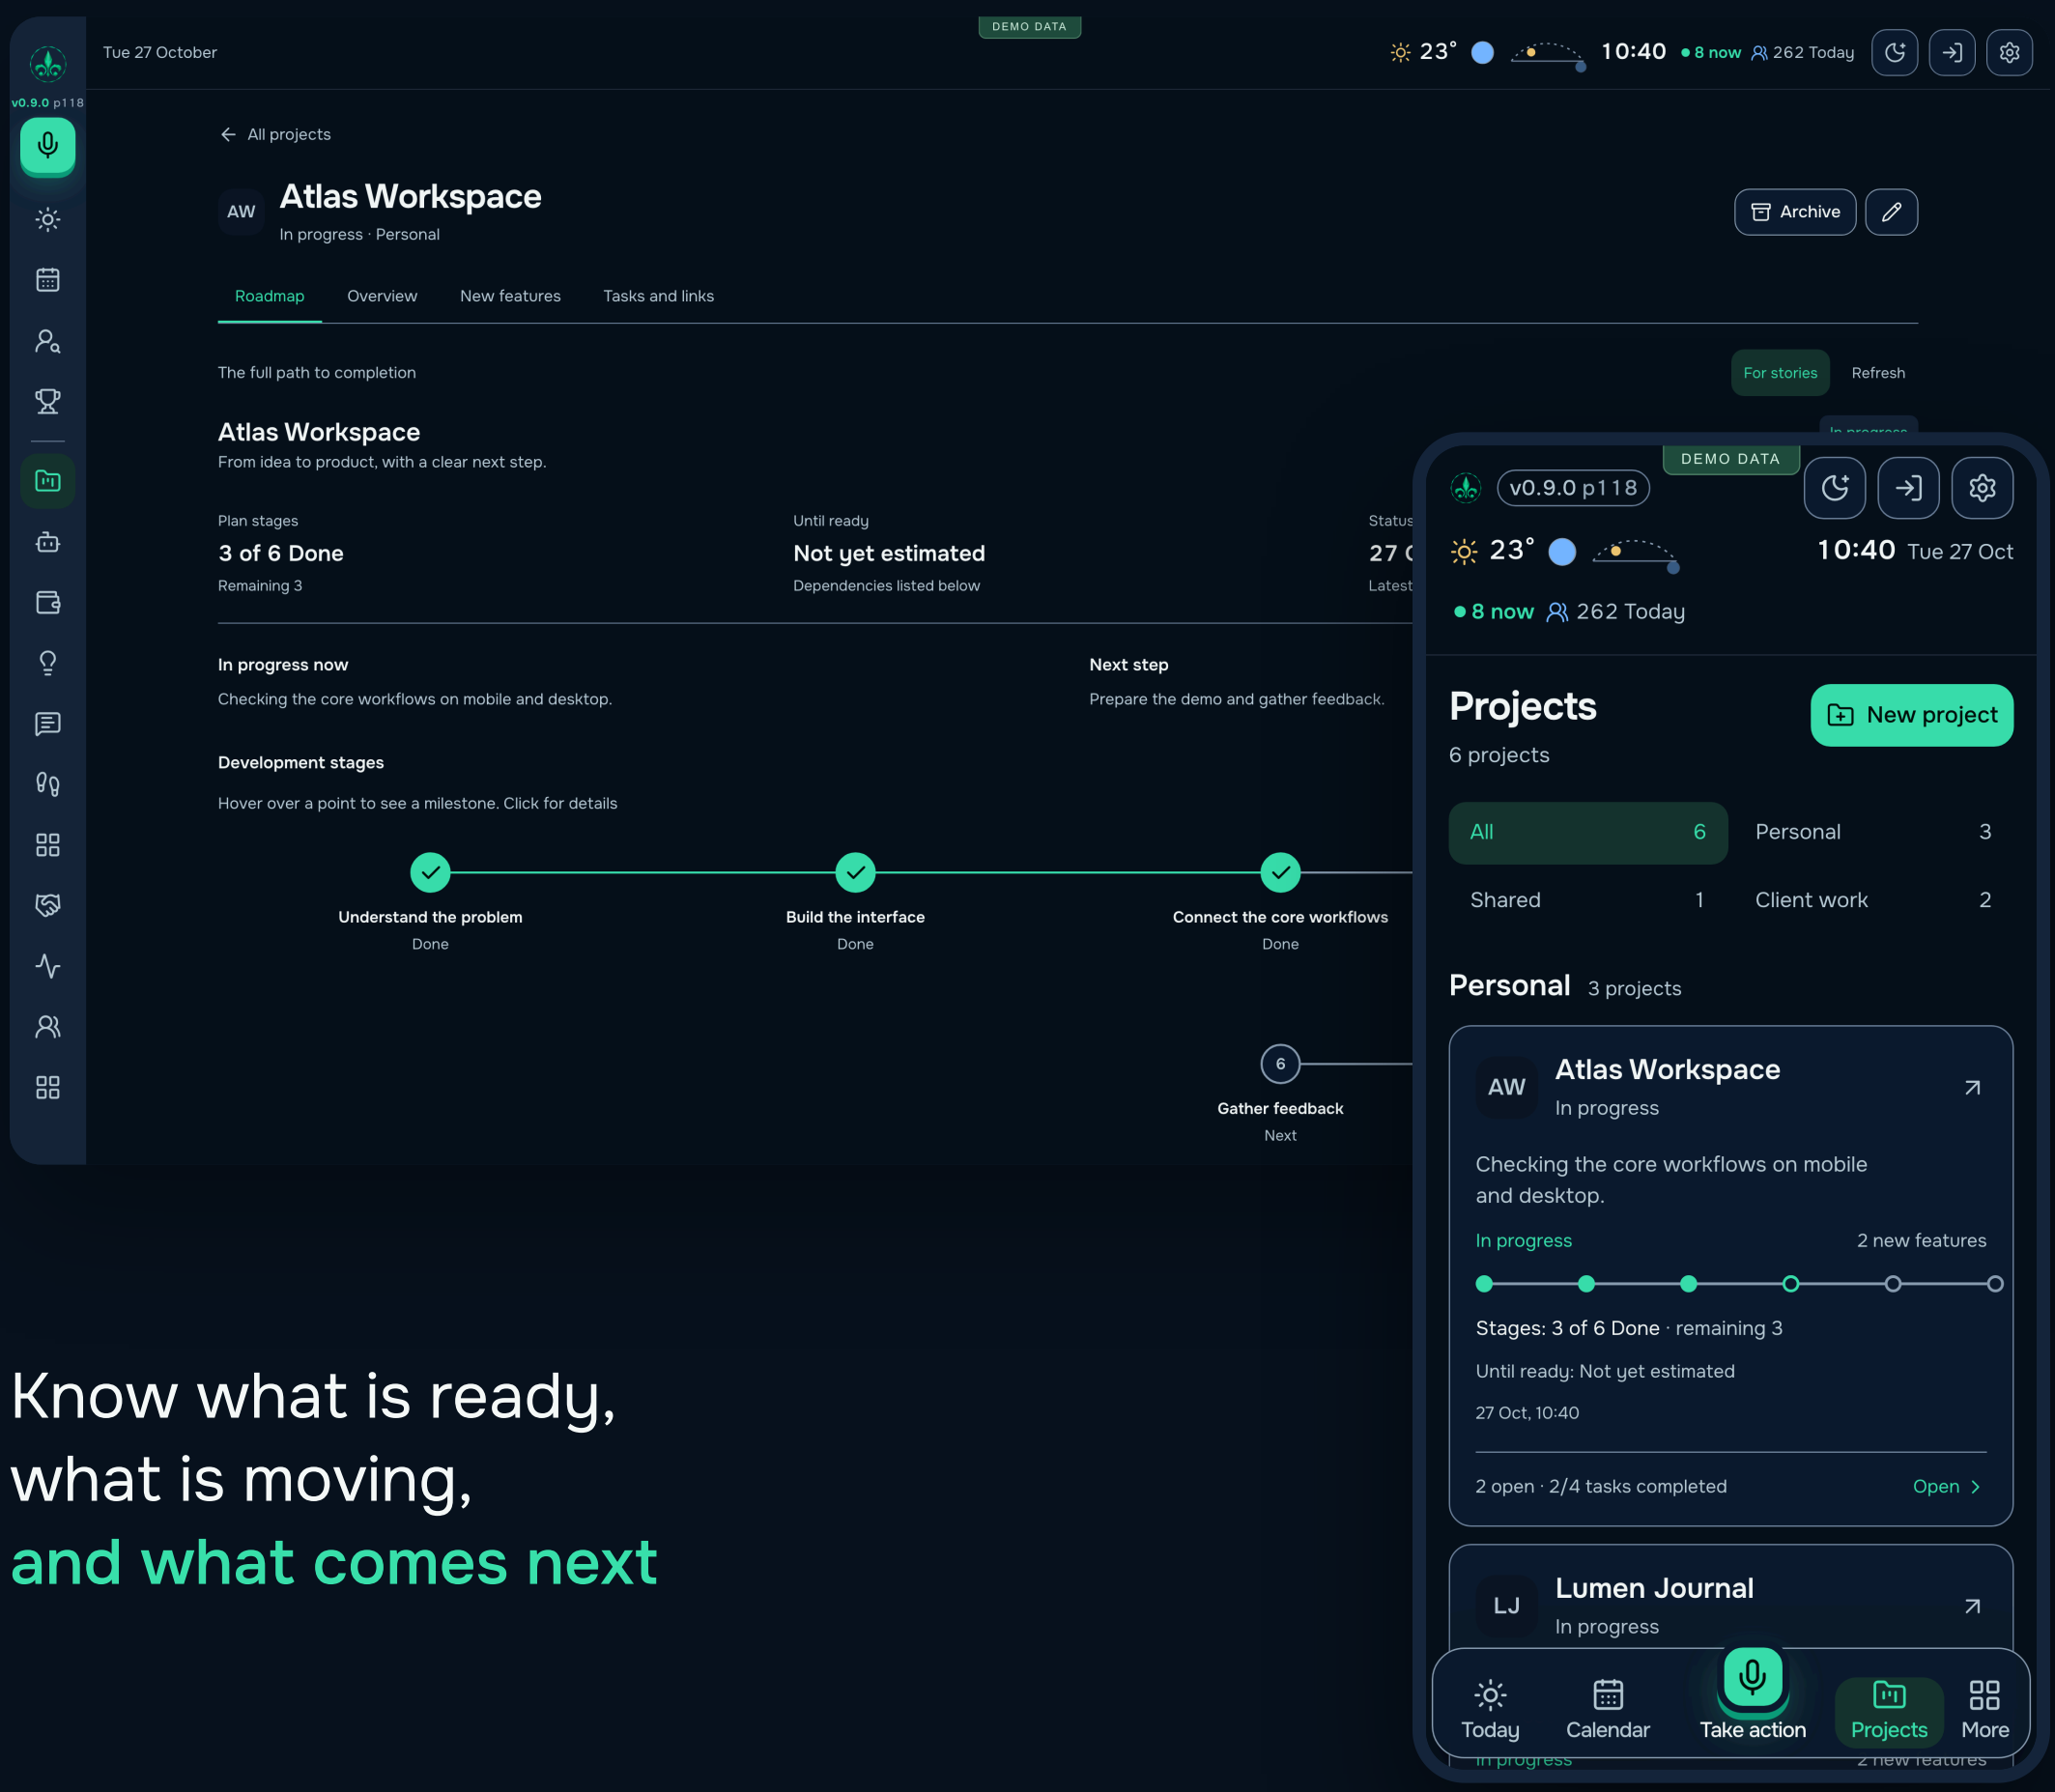

Bring tasks, meetings and focused work together.
See the day. Start a step. Record what gets done.

From a thought to a task
From a task to a result

# Every project has a next step

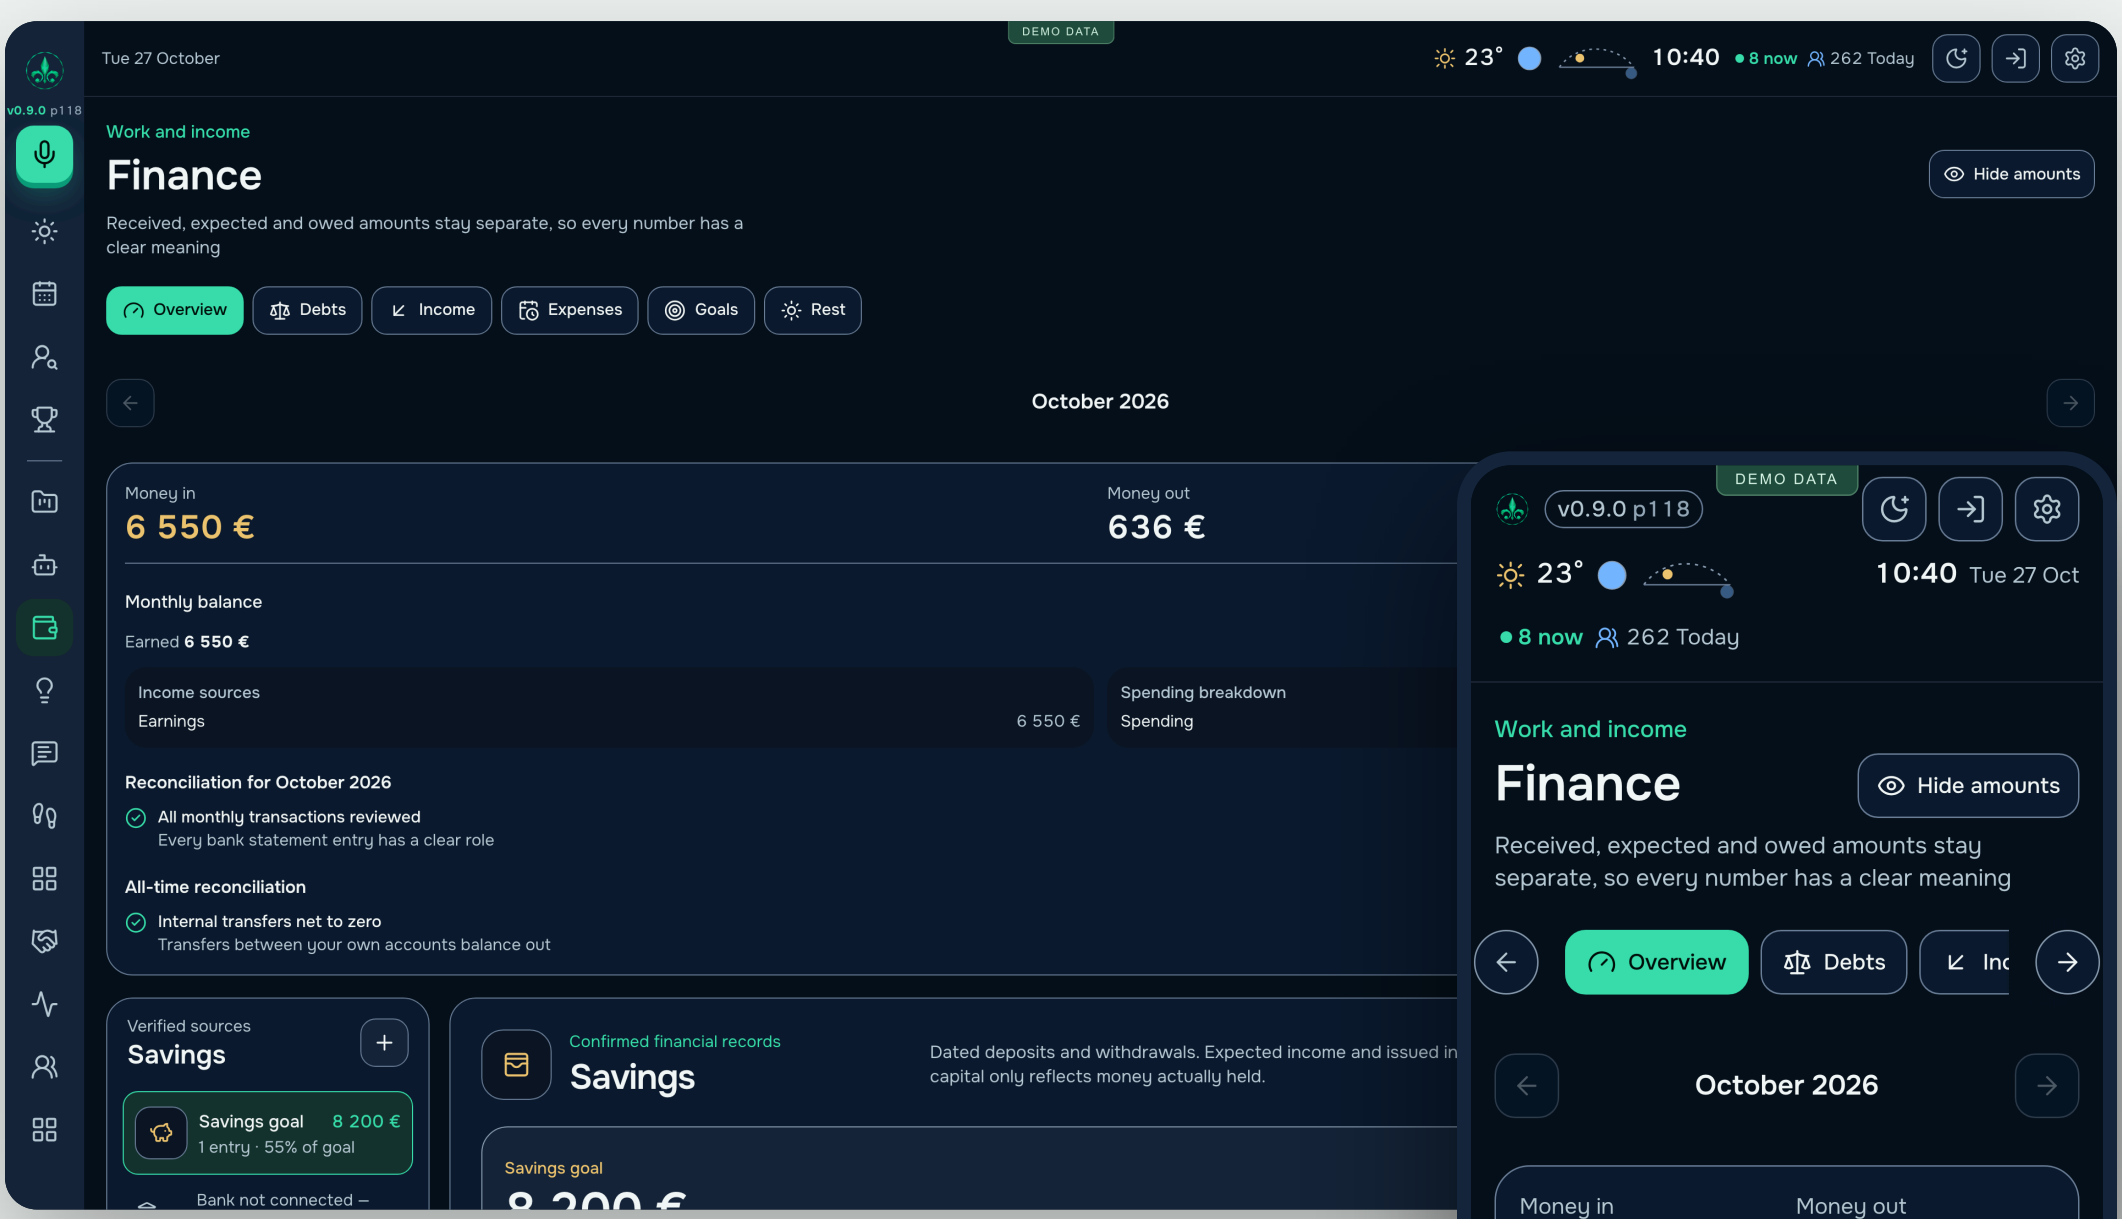

Follow the roadmap, explore new features and keep decisions connected to the work behind them.

Know what is ready,
what is moving,
and what comes next

# See the money behind the work

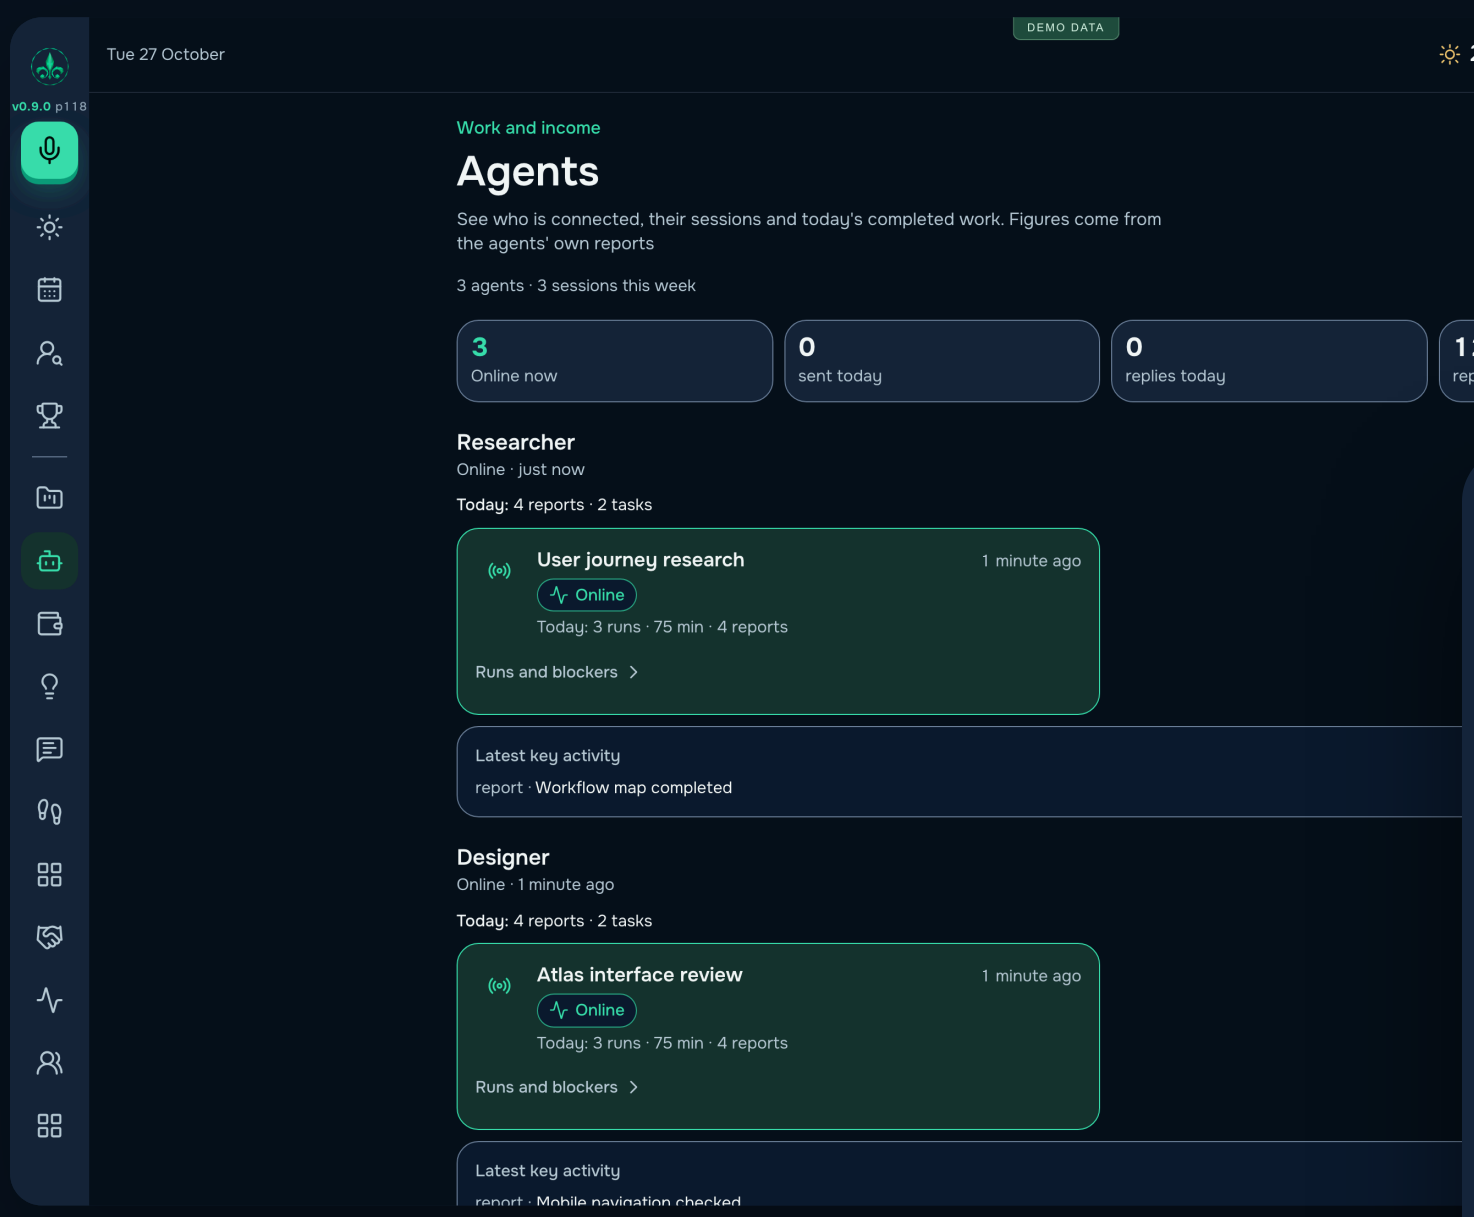

Income, expenses, commitments and goals.
The financial picture stays close to the projects.

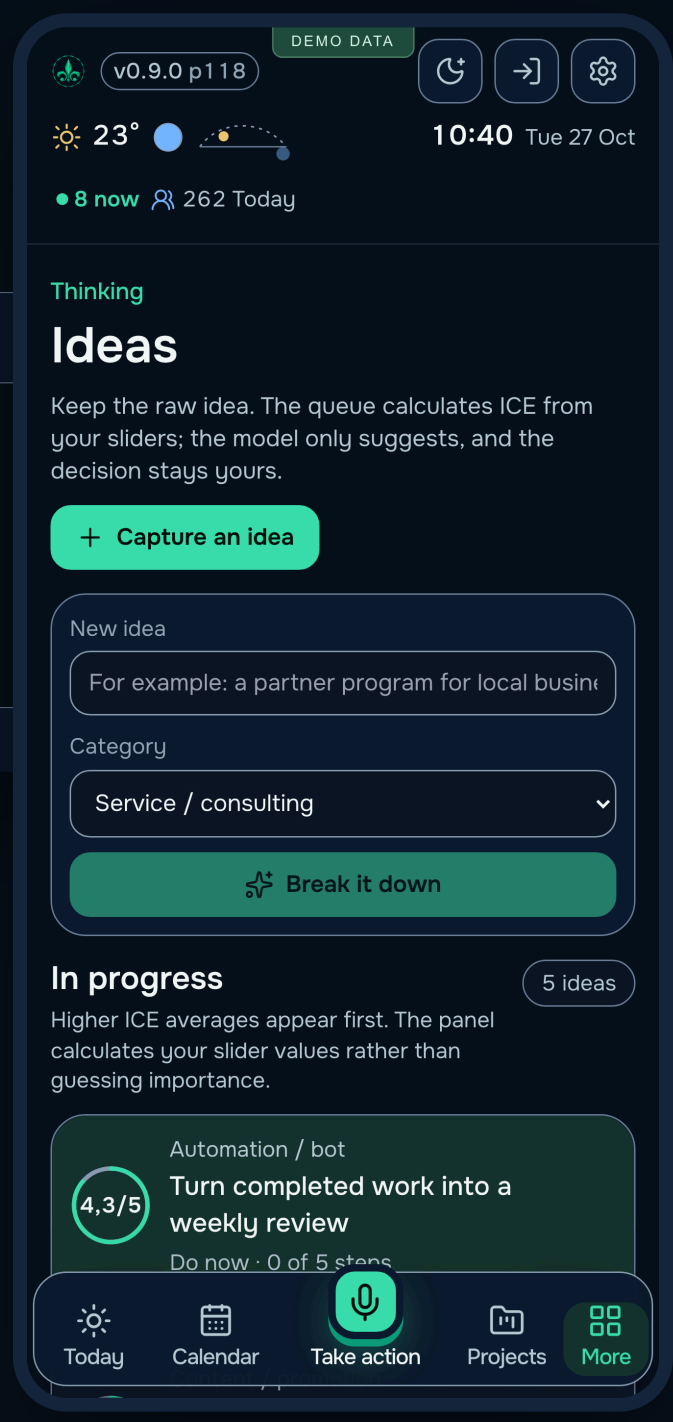

## A clearer picture
## A more informed next move

# AI needs context
# So do you

Keep agent activity and completed work visible.
Turn ideas into actionable plans while you stay in control.

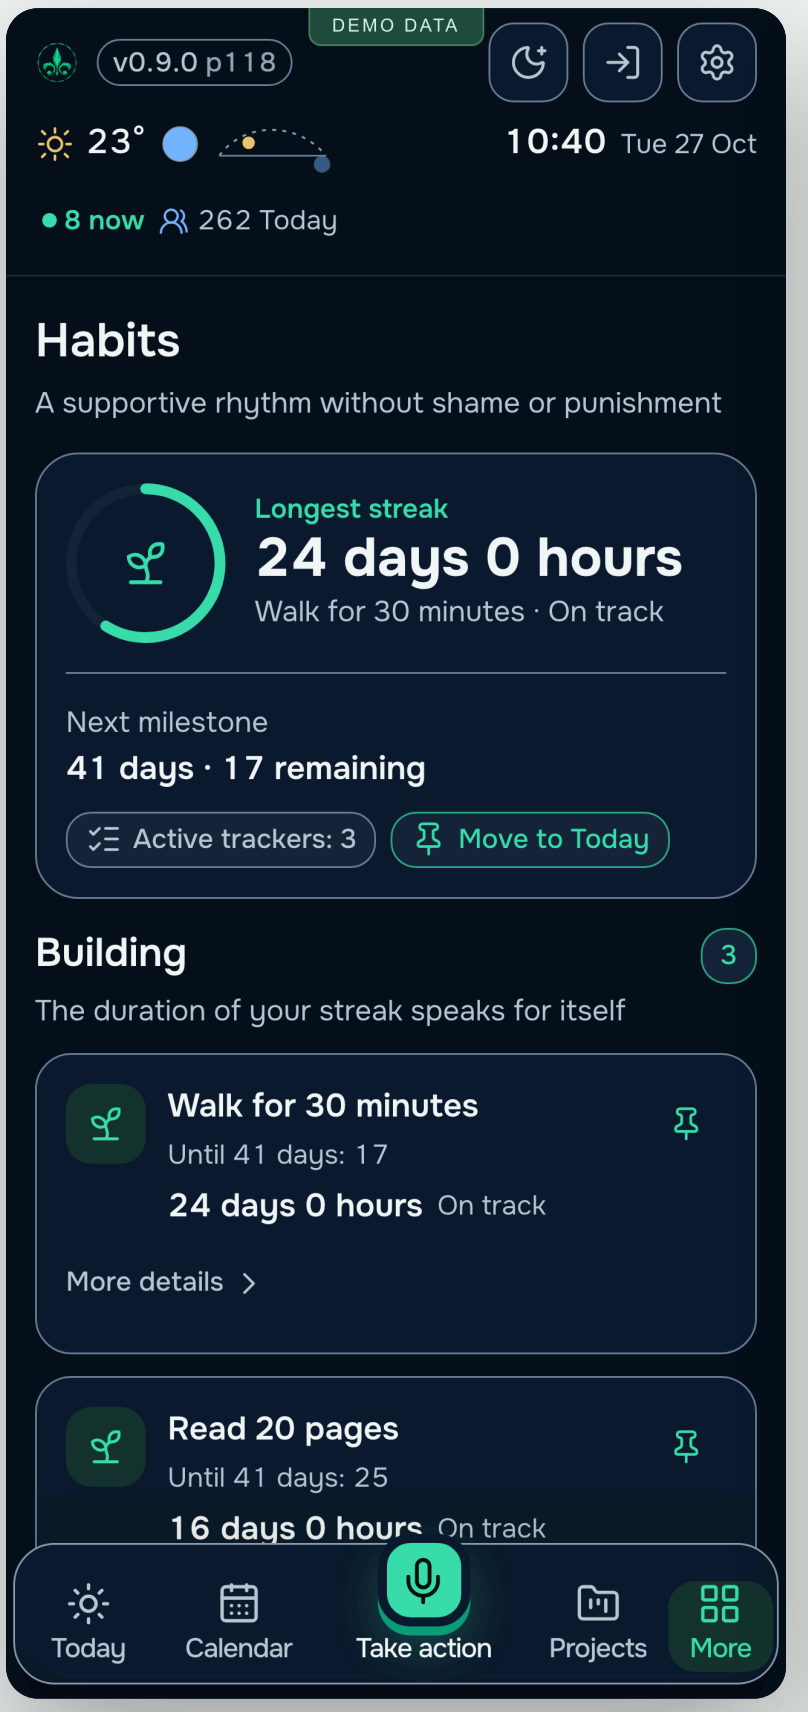

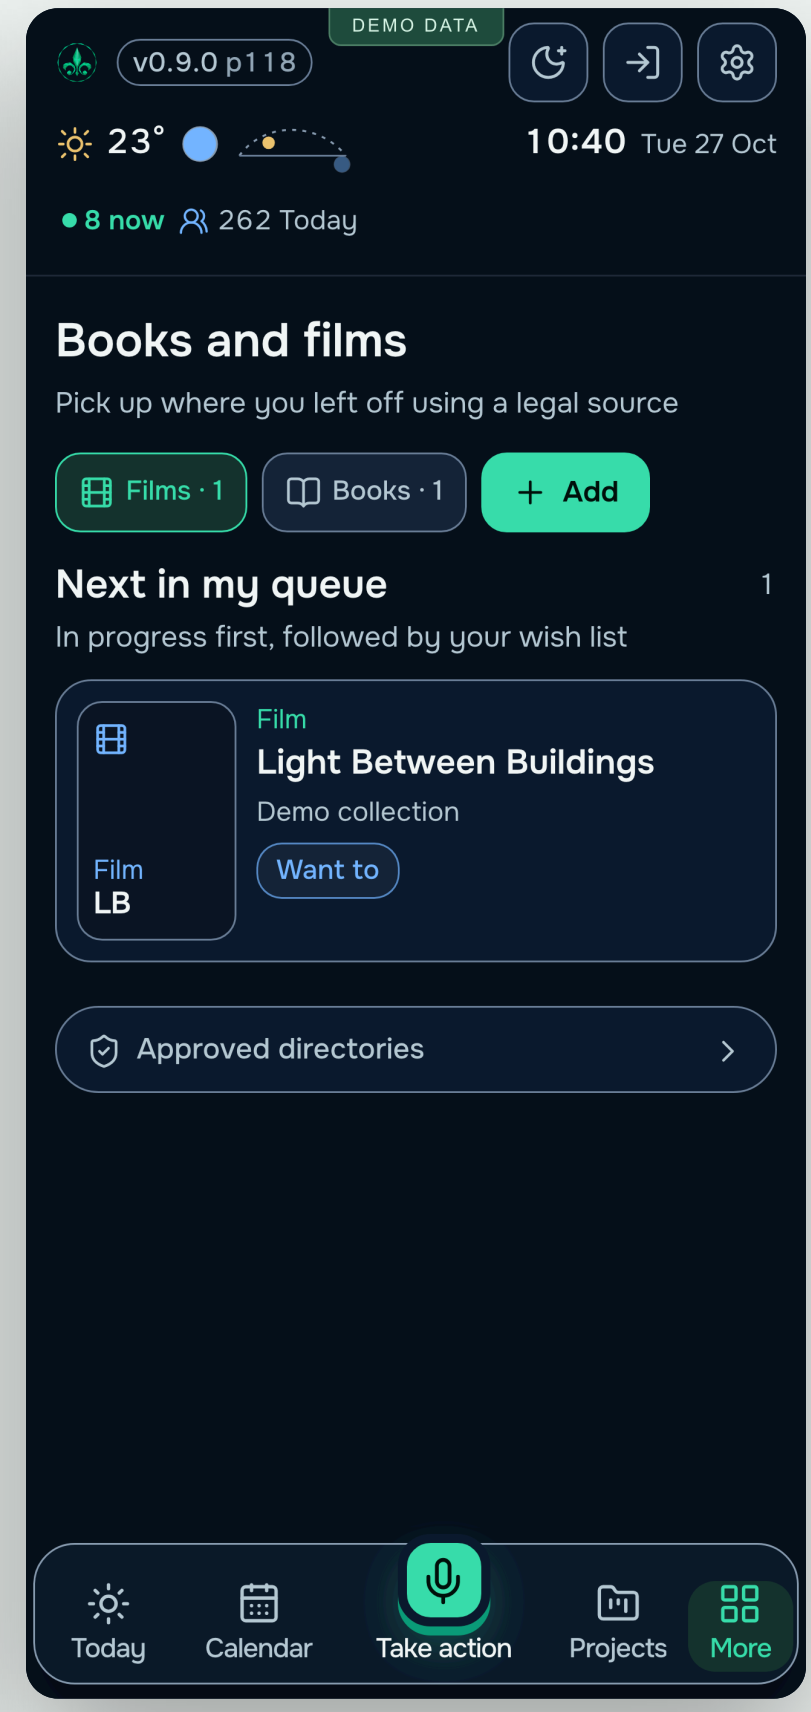

## Work, decisions and results
## In the same place

# Ambition deserves room to breathe

Habits, books, films and everyday life belong alongside the work you are building.

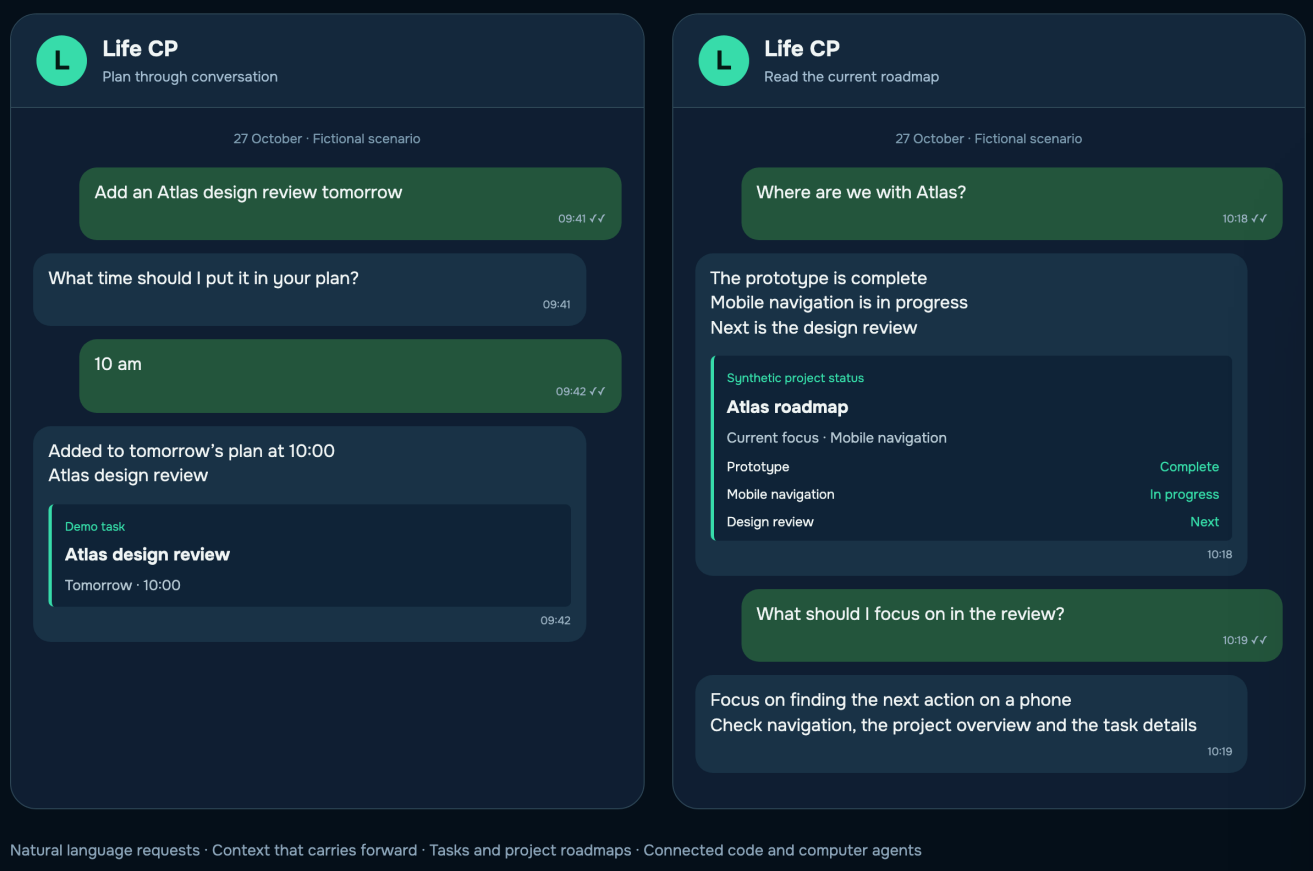

# Your control panel in Telegram

Ask naturally · Keep context · Review results
Move from a request to a plan and a verified result

LIFE CP × TELEGRAM

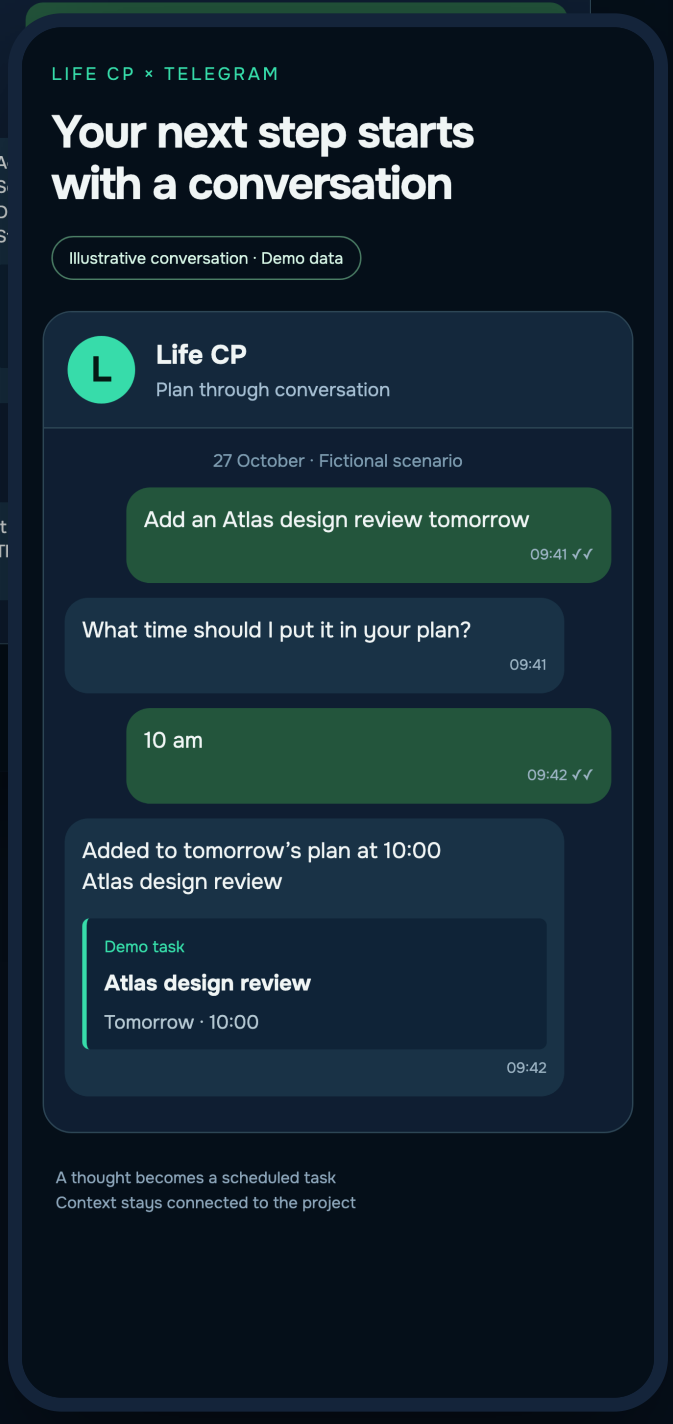

## Your control panel starts with a conversation

Illustrative conversation · Demo data

Natural language requests · Context that carries forward · Tasks and project roadmaps · Connected code and computer agents

## A plan is a starting point Completion needs a result

# Built from real daily needs

A personal product, designed and developed by Alex SOLONSKY. Explore the work at solonsky.net.
